The Easiest Solution To Leverage SAP Business One's Production Module

- Capture Production Data in Real-Time with Bar Code Scanners or Tactile Devices
- Easy & Fast to Implement User-Friendly Application
- Accurately Track Your Production Orders Details & Actuals
- Reduce Paperwork, Timesheets & Manual Data Entry
- Get the Most Out of SAP Business One Production Module

Designed with simplicity in mind, PDC-One empowers operators to simply record job status, worked hours and raw materials consumption against SAP Business One production orders using bar code scanning technology or tactile devices.

Fast to implement, and easy to use, it's an incredibly efficient tool to improve visibility and data accuracy in a short period of time.

A very simple implementation which means you're up & running very quickly, tracking your production order details and actuals with minimal disruption of your production operations & systems.

- Employees time entry and reporting
- Triggers for all normal transactions of SAP production orders, including production records, material issuing & backflushing, with stage & resource tracking
- Serial number, batch & lot management
- Badge/bar code scanning support
- Integrated production status dashboard
- Built with web-browser technology & compatible with almost any device
